# NEJM - Steps of Evidence

a subjective bibliography of  
free-to-access articles

by Ossip N. Groth

The NEJM, now in its 201st year running, is our source of the most important advances in clinical medicine. It publishes many landmark trials, especially in cardiology, and many unique findings, especially in the immunodeficiencies.

Whereas the most distinguishing contents, the weekly Cases, are not freely accessible and remain to be the top reason for its wide personal distribution, the original articles and some educational materials are free-to access.

This bibliography gives a subjective collection of about 25% of the available 13.000 free items.

Systematically, the about 2.000 'Images in Clinical Medicine' are omitted and I will setup an online page at [www.kidney.de](http://www.kidney.de) to access these short messages of the one-click-signs of medicine.

The records are indexed by a simple IndexMedicus-style system with an OrganSystem monotag.

All oncology papers are in 'Neoplasms' irrespective of organs involved; most rheumatic/autoimmune are in the 'Hereditary and Systemic' section. Coagulation goes into 'Immunology'.

There is no systematic multitagging of the records, so any paper is covered only once in this printed bibliography.

The Medline Searches were run with a php based system on  
[www.kidney.de/sitesearch.php](http://www.kidney.de/sitesearch.php),  
using the search term

**N Engl J Med [JOUR] AND free full text[sb]**

The printed list of citations was screened manually, items were entered by scanning barcodes into my special Visual-Basic-based software, then tagged on a two-letter-system ultimately to give a .txt database in Medline-style, which would be automatically transformed into the html code of this ebook, then merged in LibreOfficeWriter ultimately to obtain the publication-grade PDF document.

The overall structure of the simplified ontology on which all records were tagged is shown in the appendix to give the user a feeling where to locate items.

In the respective concepts, you will locate those reviews which are appropriate to your interests, and you should be able to obtain items online for free.

The searches for this edition are actualized on
