Selected Bibliography

2013 March

by Ossip N. Groth

Covering all aspects of Fibrosis and some observations in related areas, especially Tumor Biology,

this Bibliography contains medical and scientific articles the PubMed records of which were modified in March 2013 and which were rated to be of interest to the users of this Bibliography by subjective decision.

This month gives 5200 articles , from which about 1500 items have been rated as appropriate to be included in my resources.

The records are not tagged/indexed because the concepts show to high an overlap.

All records have been included irrespective of the OpenAccess/HybridAccess/UnfreeAccess publication type.

The Medline Searches were run with a php based system on www.kidney.de/sitesearch.php, the search term was
